Exhibit 2
Hewlett Packard Sales Reporting Plan

Hewlett Packard will provide reporting to Texas DIR as contractually required on a monthly basis. The monthly sales report will consist of Texas DIR sales that are generated from HP order administration for direct order fulfillment and sales generated by Go Direct Authorized resellers. These orders are fulfilled through non-HP distribution channels. The current Go Direct Authorized channel resellers are contractually required to report Texas DIR sales orders that are filled through the channel on a monthly basis.

In the event that a Go Direct Authorized Reseller should fail to provide the necessary reporting as outlined in the HP Texas DIR reseller agreement, HP will allow such reseller a fair and reasonable period of time to remedy such violation. However, a reseller that fails to take the necessary steps or has a history of such violation may be removed from the Texas DIR contract at the sole discretion of HP.

In order to ensure the accuracy of the data being reported to Texas DIR, a new process has been implemented that will require multiple individuals within HP to validate the report data prior to submission to Texas DIR management. Furthermore, a newly developed internal template (Figure A) will be used to verify contractually required reporting from all Go Direct Authorized Resellers. All reports will be submitted to Texas DIR by the 15th of each month.

Month of _____

GoDirect Reseller	Direct Sales	Indirect Sales	Total Sales	Admin Fee
